

**8th INTERNATIONAL SEMINAR ON MODERN POLYMERIC MATERIALS
FOR ENVIRONMENTAL APPLICATIONS**

including

Special Session

‘Polyhydroxyalkanoates: Synthesis, Modification and Applications’

BEST POSTER PRIZES - RESULTS

Poster Session Committee, based on the scientific quality, originality of research and layout/way of presentation of the posters presented at the MPM2023 conference, has awarded:

1st Prize: Kinga Ślusarczyk et al. – “Tertiary amine in dual role of monomer and reducing agent in μL scale SI-ATRP”,

2nd Prize: Karolina Stachowicz et al. – “Hydrogen bonding and glass transition in non-isocyanate polyurethanes with a hydrophilic backbone”,

3rd Prize: Magdalena Jankowska et al. – “Photopolymerization nanocomposite initiated by photocatalytic initiating systems”.

Congratulations to all awarded Authors!
